**DETAILED ACTION**

1. The preliminary amendment filed on 8/6/2008 has been entered.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4,7,15-18,20-21,26-30 rejected under 35 U.S.C. 102(b) as being anticipated by DeJonge 6,338,422.

DeJonge discloses a fluid dispensing device as seen in Figure 1, which comprises a hollow housing (10), an orifice (90), a reservoir as seen in Figure 3, a pump (100), an actuating mechanism (50), wherein a force applied to a portion of the actuating mechanism in a first direction causes the actuating mechanism to move the pump in a second direction and causing it to expel fluid from the reservoir through the nozzle and out of the device as seen in Figures 3-4, the first and second directions are at approximately 80 to 100 degrees to each other as seen in Figure 4.

***Allowable Subject Matter***

4. Claims 5-6,8-14,19,22-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
